CAPABILITY STATEMENT

# ATX Software Labs

Austin, Texas | contact@atxsoftwarelabs.com

## Services

The company website says ATX Software Labs designs, builds, and ships mobile apps, cloud backends, and web applications. The terms of service add software development and consulting, under separate agreements and project scopes.

## Relevant experience

**Reliant.** A production e-commerce operations platform designed, built, and operated by ATX Software Labs. It consolidates order management, purchasing, and fulfillment across Walmart, Best Buy, eBay, and Target, with ShipStation v2 and Amazon Selling Partner API integrations. The stack is FastAPI (Python 3.12), Next.js/React/TypeScript, PostgreSQL 16, and Redis, deployed with Docker on Google Cloud. Security controls include JWT sessions in HttpOnly cookies, multi-factor authentication, role-based access control, and audit logging. Automated testing uses pytest and Playwright. Product screenshots are published on the company website.

**iOS financial services applications.** Contributed to retail iOS applications of a major US brokerage, working in established Swift codebases spanning UIKit and SwiftUI. Delivered market-data features (indices, futures, movers, news, quote details), diagnosed and fixed production defects across UI, navigation, and asynchronous streaming data flows, and added XCTest regression coverage. Work followed Jira tickets and GitHub pull requests in a modular Swift Package Manager architecture with Bitrise CI.

**This website.** The current site is HTML, CSS, and JavaScript served by a Python application, packaged with Docker and deployed on Google Cloud Run. That is the studio's own site, not a client engagement.

## Differentiators

Full-stack ownership from data model to shipped interface, across iOS, web, and cloud backends. Production integration experience with marketplace and shipping APIs. Security practices applied in shipped software: MFA, RBAC, audit logging. Test discipline across stacks: XCTest, pytest, and Playwright end-to-end suites.

## Company identifiers

| | |
|---|---|
| **Legal name** | ATX Software Labs LLC - unverified against SAM.gov. This is the name on the website. |
| **UEI** | CDLUPRHJQJC4 |
| **SAM.gov status** | Unverified. No registration status is stated. |
